  - (2) When the USB Phone is ringing on an incoming call, press 📞 to answer the call.
  - (3) Redial the last called number at the addressbar in Skype windows.
- 📞 : Hang up, Close the Skype windows.

  - (1) When you want to end a call or refuse a call, press 📞 to hang up.

  - (2) Close the Skype windows anytime.

Remarks: Except for the Hang Up key, the Skype™ windows will pop up as you press any key on the phone.

➲ System Requirements:

- ▫ Windows 98SE/ME/2000/XP
- ▫ Pentium II 233MHz or Higher
- ▫ RAM 32MB or Higher
- ▫ Free USB Port
- ▫ Available Internet Connection

➲ How to Work with Skype™:

Run Skype

- ▫ Download Skype software and install it (www.skype.com), the version

  must be 1.0.0.106 or higher.
- ▫ Run Skype and log in with Skype account.

You can create a Skype account as shown below:

After the software startup, the icon will appear to the system tray as shown
below:

That indicates the Skype has successfully connected to Internet.

If it hasn't connected to Internet, the icon will be shown as , now you have to check whether PC is connected to Internet successfully or not.

Connect USB Phone to PC

- Connect USB Phone to PC, the LCD shows "VOIP- Phone".

Run Skyfree on the CD

- Install the driver Skyfree from the CD enclosed in the package.

 The Skype program will pop up the window as shown below:

Select the first item "Allow this program to use Skype", click "OK" button.

Note: If you selected the wrong item, you can execute "File->Options-> Privacy-> Manage other programs' access to Skype->Change->OK" to open the window as above to make the correct selection again.

After running Skyfree, the icon will appear to the system tray as shown below:

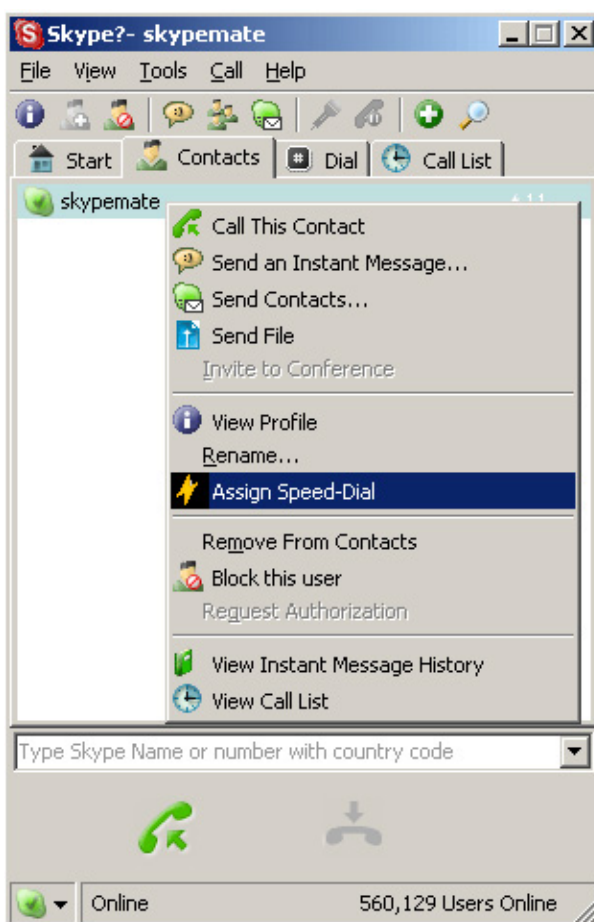

That indicates the device and Skype are connected successfully.

 If the icon is shown as , please run Skype first.

 If the icon is shown as , it means USB Phone is connected incorrectly, please reconnect USB Phone to PC.

Call another Skype user (PC to PC)

- Add a Skype mate to Contacts
- Assign Speed-Dial for it, for example "11"

- Input the number and call out:

    Press digital "1" and "1" on USB Phone, this number will be shown on the

    addressbar in Skype window, then press SEND key   to call out.

- You also can press **C** key to change the Tab in Skype window to Contacts, and then use the Up/Down key to move the light bar to the person you want to call.

    Press SEND key   on USB Phone to call out.

Call to regular phone (PC to Phone)

- Press "00"+"country number"+"phone number", then press .

    For Example: call to Taipei, Taiwan, press 00886212345678, then press SEND key.

00886	2	12345678
--------------	----------	-----------------------
country code	city code	telephone number

Note: If you want to use this function, you should buy SkypeOut Credit first.

Answer a call

When the USB Phone is ringing on an incoming call, press [icon] to answer the

call, or press [icon] to refuse the call.

Adjust options (Volume and Ringer)

Double-click the [icon] on the taskbar, then you can adjust the volume and ringer.

➲ FAQ:

Problem 1

The voice is coming through the PC's sound card instead of the USB phone
when I make/answer a Skype call.

Resolution

Open the main window of Skype, click on "File->Options", and go to the
table **Hand/headsets**, set **Audio In**, **Audio Out** and **Ringing** all to the **USB
Audio Device**.

Problem 2

There is no voice coming out of speakers when playing music.

Resolution

Please execute the "Control Panel->Sound and Video ([icon])->Audio", set
Sound Playback and **Sound Recording**'s Preferred device to your sound
card, it's shown as below:

Problem 3

Skype has been startup, but the icon of Skyfree still is shown as .

Resolution

Maybe you selected the wrong item, you can execute "File->Options->Privacy-> Manage other programs' access to Skype->Change->OK" to open the window as below, and select "Allow this program to use Skype".
